Blue Robotics Inc.

- Torrance, California
- 17 Employees
- www.bluerobotics.com

Blue Robotics was founded in 2014 with a mission to provide *low-cost, high-quality* components to enable the future of marine robotics.

An Enabling Product Line

T100/T200 Thrusters

Subsea Lights

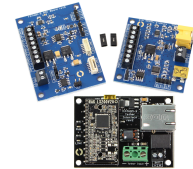

M100/M200 Motors

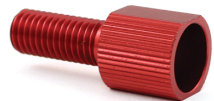

ROV Tether

**Watertight Enclosures
(2", 3", 4", 6", 8" Series)**

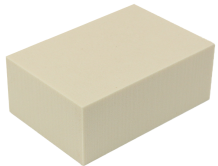

**Tether Communication
Interface Boards**

Cable Penetrators

Echosounder Altimeter Sonar

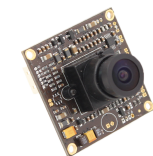

**Subsea Buoyancy
Foam**

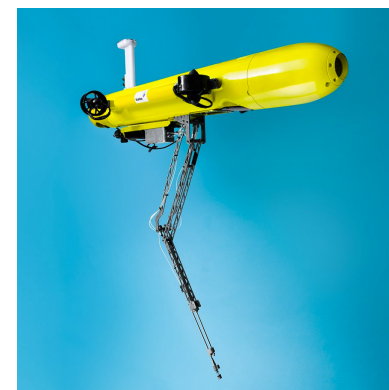

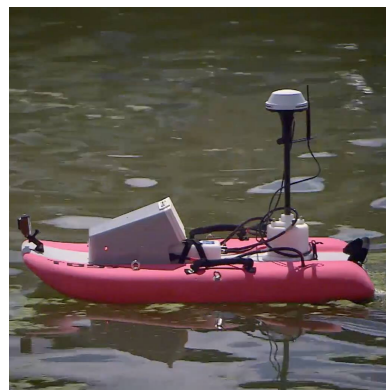

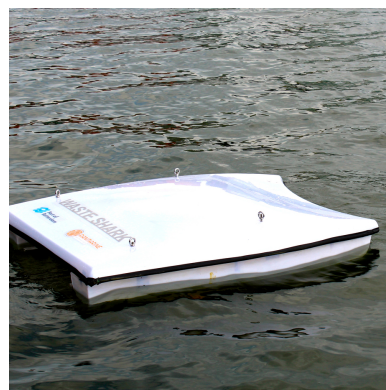

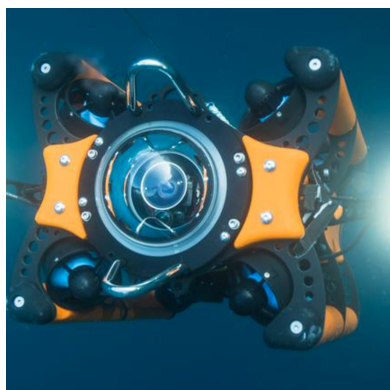

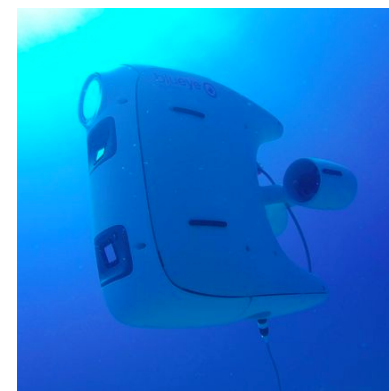

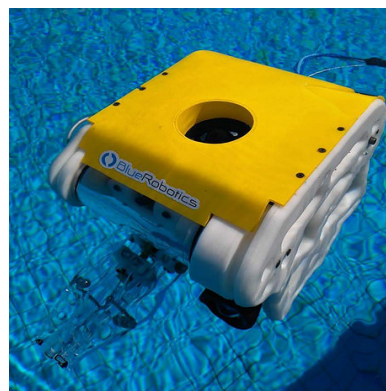

**Pressure and
Temperature Sensors**

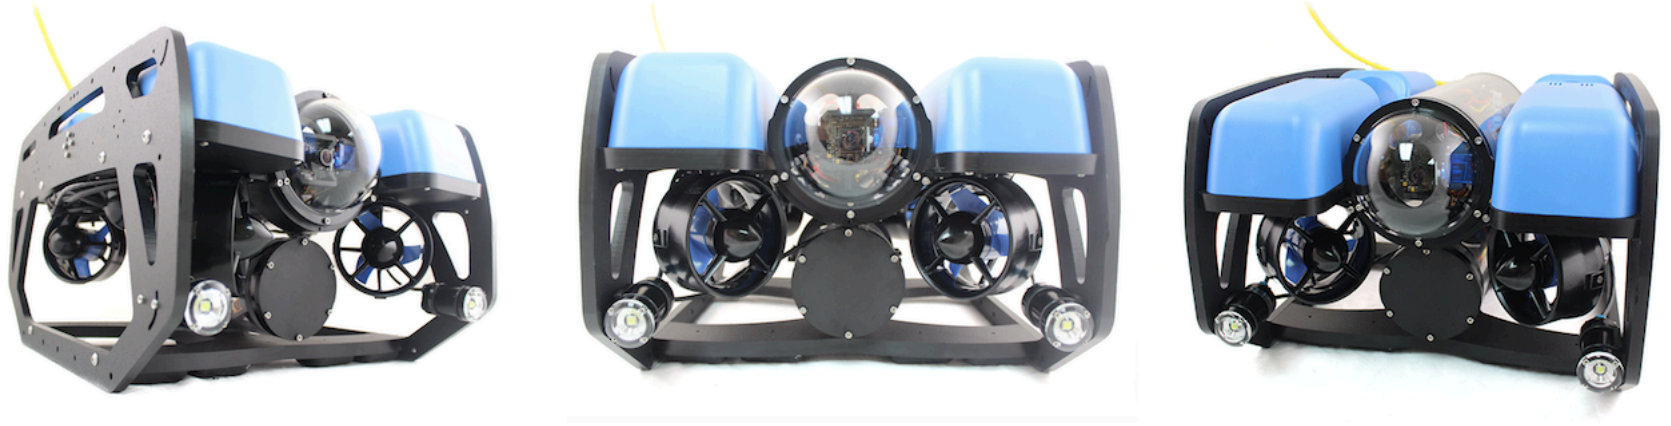

Many more:

Components in Use Worldwide

BlueROV2:

- Vectored Thrusters
- 1080p HD Video
- 100m Depth Rating
- Compact, Expandable Design
- Partially Assembled Kit

ArduSub Software:

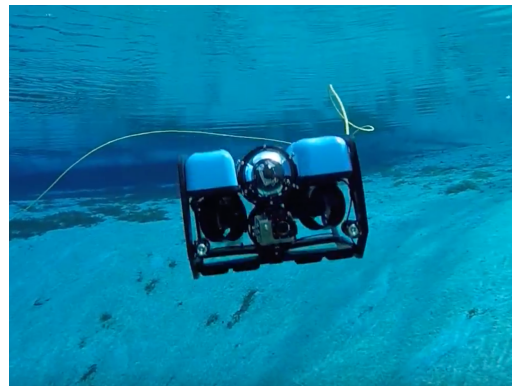

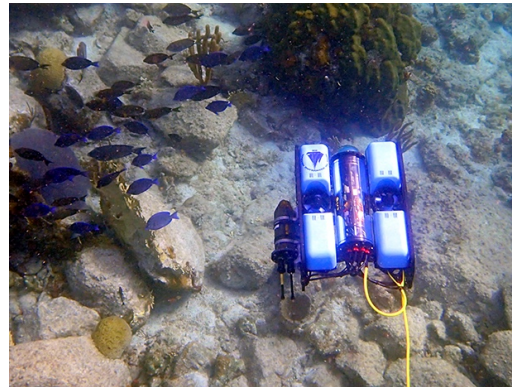

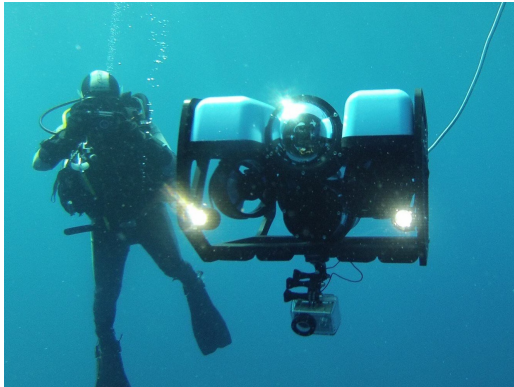

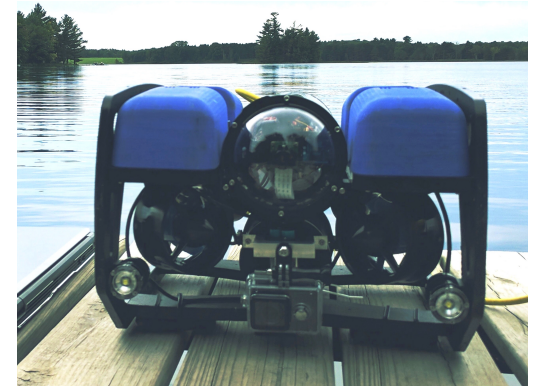

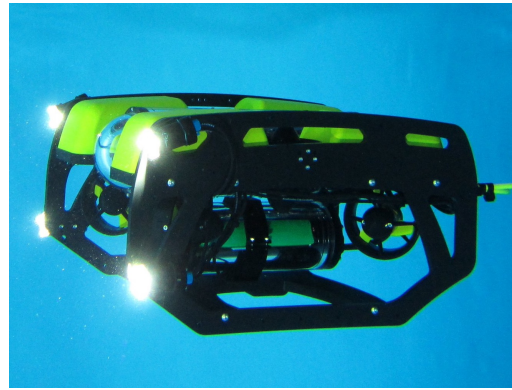

- Part of the ArduPilot Project
- Open-Source, Open-Hardware

~\$3500 standard configuration

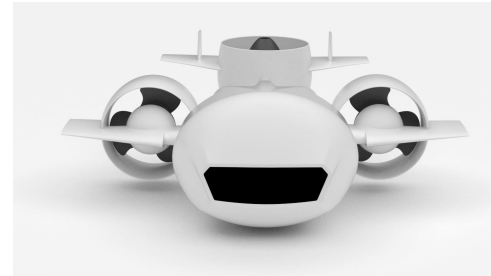

400+ sold since launch in June 2016

BlueROV2 Now

A Turning Point for Marine Robotics

An explosion of new vehicles and technology.
